

SKYDATA-IoT

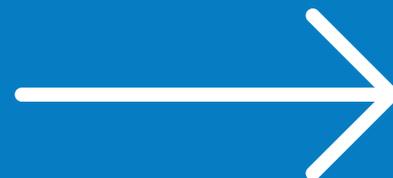

Top 7 List.

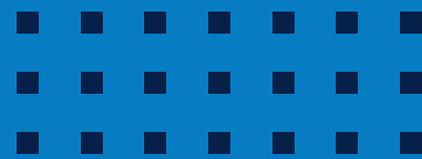

Why choose
SKYDATA-IoT for
your cellular
connectivity

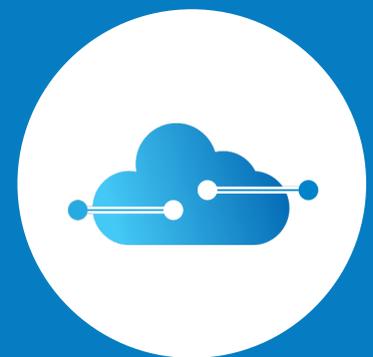

www.SKYDATA-IoT.com

One SIM, One Solution

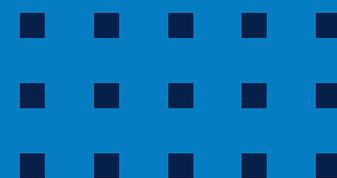

-
- The simplicity of having control of your global deployment under countless networks with a single platform, provider and SIM.

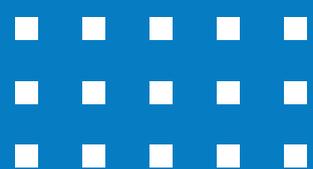

- Open roaming with global multi-network connectivity.
- Access to over 200 countries.
- Permanent roaming profiles are available in countries such as Canada and Brazil.

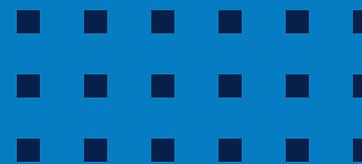

global
coverage in
200+
Countries

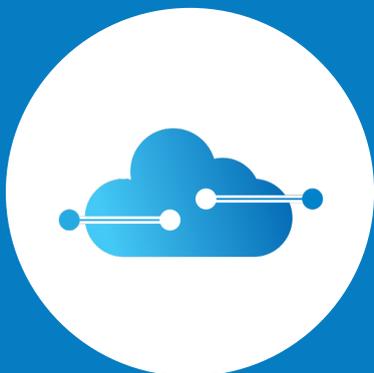

700+ Carrier partners

3

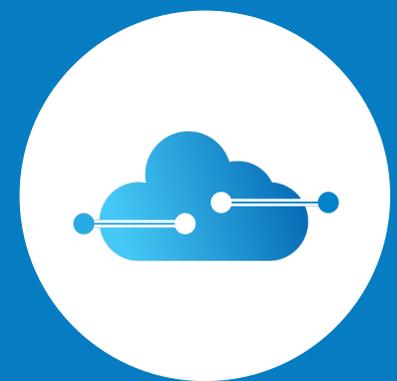

- Keep your devices connected by seamlessly roaming on multiple networks with the largest LPWAN coverage in the market.
 - Open roaming with global multi-network connectivity
 - No steering or speed throttling
-

4

Tailored, affordable, and flexible data plans designed for your specific business needs, with pooled data plans for optimal use.

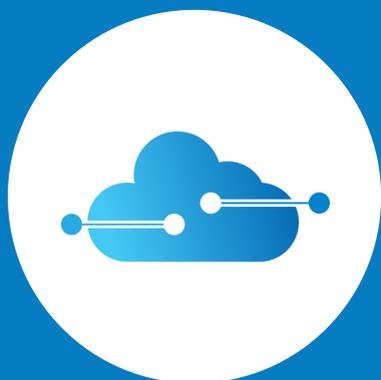

customizable
data plans

no long-term contracts or minimum requirements

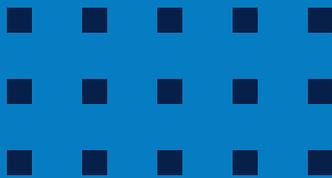

- No hidden costs or additional fees.
- No long-term or volume commitments, unlike our competitors.

secure online client SIM management portal

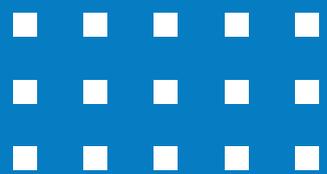

- Secure Global Enterprise Portal with 24/7 web account access via industry-standard SSL protocol.
- Complete control of SIM deployment, including activation, suspension, termination, alerts, data limits, reporting, and billing.

Scalability and flexibility for future growth

- Our technology core enables deployment of a few hundred to millions without impacting your services. It supports single-sim to bulk processing and API integration for full automation.
- Future-proof your deployment with e-SIM/EUICC technology for over-the-air updates to the roaming profile
